1. **Identify the main topic or question.** The main topic is the relationship between the number of people in a group and the number of handshakes.

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group was divided into two subgroups: the control group and the experimental group. The experimental group was divided into two subgroups: the control group and the experimental group. The control group was divided into two subgroups: the control group and the experimental group. The experimental group was divided into two subgroups: the control group and the experimental group.

Age Group	Percentage
18-24	~12%
25-34	~32%
35-44	~28%
45-54	~22%
55-64	~18%
65-74	~15%
75-84	~10%
85+	~5%

This figure shows a 3D model of a complex, multi-layered structure, likely a protein or a molecular assembly. The structure is composed of numerous small, interconnected components, forming a dense, layered network. The overall shape is elongated and somewhat irregular, with a grid-like pattern visible on the surface, suggesting a crystalline or ordered arrangement. The model is rendered in a dark, textured style, with a grid overlay that highlights the underlying structure. The background is a light, neutral color, providing a clear contrast for the dark model.

On January 1, 2000, the company was reorganized to form a new entity, *Wendell's*, which was a wholly owned subsidiary of *Wendell's*. The reorganization was completed on January 1, 2000, and the company's financial statements for the year ended December 31, 2000, reflect the results of operations of the company as a subsidiary of *Wendell's*.
